

BioSolve Supplier Technology Showcase

Securely access the latest supplier technologies

- **Share**
Suppliers can share new technology with select users approved by them
- **Evaluate**
Users can evaluate the very latest models of supplier technology
- **Secure**
Suppliers can transfer various unit operations and processes through the secure Microsoft Azure platform to the end user community.

The BioSolve Supplier Technology Showcase provides access to the very latest technology models to enable you to factor new developments into your bioprocess modelling.

Enabling rapid evaluation of new technologies using consistent data, the Supplier Technology Showcase allows you to transfer scalable unit operations and processes with associated cost data.

Reducing costs, informing decisions, insight for innovation.

Supplier Technology Showcase: How it works

For suppliers:

- Supplier prepares model
- Submits to Biopharm Services for checking
- Biopharm Services:
 - Checks scalability
 - Checks model compatibility
 - Tests
 - Develops documentation
 - Approves
- Model published to Supplier Technology Showcase website

Use the Supplier Technology Showcase to:

- Store equations inside BioSolve Connect
- Move Unit Operations between BioSolve Process & BioSolve Connect
- Distribute approved models to users
- Set up standard unit operation models across
- Record all process models
- Store and develop standard equipment lists
- Build standard specifications
- Benefit from one common dataset

For users:

- User requests permission to access a supplier technology model
- Supplier receives the notification and uses a digital signature to agree distribution
- Biopharm Services receives the notification that the supplier approved or disapproved the access
- Biopharm Services will let the client know the outcome and proceed accordingly

Storing Unit Operations in a dataset framework ensures that they are:

- Audited
- Locked
- Available anywhere, with all relevant information transferred

Security:

- Hosted on Microsoft Azure platform
- Users are given specific login credentials and allocated access to specific technologies
- When a user leaves a company, their account will be disabled

Launch showcase technology from:

Biopharm supports biopharma innovators across the globe.
